

THE GLOWING STONE PANEL ANEW STYLE BASIC AND DELUXE CONTROL OPTIONS

CHANGING CONTROL OPTIONS

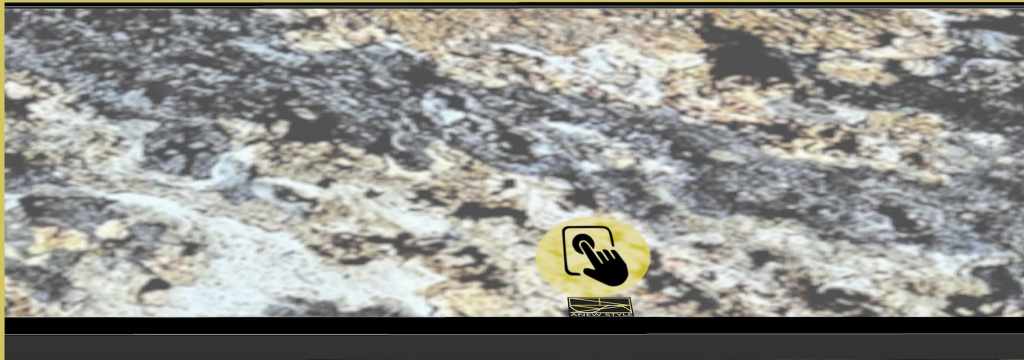

The three-position slide switch on the backside of the glowing stone panel allows for operation in two modes:

TOUCH CONTROL

The touch controller is located in the centre of the longer side of the glowing stone panel, adjacent to the **ANEW STYLE** logo, as depicted in the picture.

**Please note that the backlight is inactive when operating in touch control mode.*

RF WIRELESS REMOTE CONTROL

"ON" BUTTON

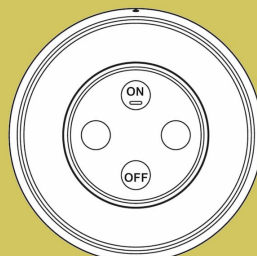

LEFT BUTTON

Pressing the left button allows you to make the following adjustments using the touch ring for 3 seconds:

Short press once to simultaneously adjust the brightness of the glowing stone panel and its backlight (maximum brightness is achieved at the far right position).

Short press twice to adjust the brightness of the backlight (maximum brightness is achieved at the far right position).

Turn on the glowing stone panel and use the touch ring to adjust the brightness.

"OFF" BUTTON

Turn off the glowing stone panel.

RIGHT BUTTON

Pressing the right button allows you to make the following adjustments using the touch ring for 3 seconds:

Short press once to adjust the backlight temperature (1800K to the left, 6500K to the right).

Short press twice to adjust the brightness of the glowing stone panel (maximum brightness is achieved with the blue colour).

SMARTPHONE CONTROL

Download and install Tuya Smart app from Apple Store or Google Play, or simply scan the QR code.
